SABATTI ROVER HUNTER

Sabatti presents the all-new Rover Hunter bolt-action hunting rifle, as part of the completely redesigned “Rover” family of rifles.

Sabatti presents the new ROVER family of rifles, a completely redesigned set of bolt-action rifles intended for hunting, sport shooting and professional uses. The new Sabatti Rover family of rifles carries on the high quality, high accuracy tradition and decades old experience of the World appreciated classic Sabatti Rover bolt-action design, further improving it with a redesigned action and bolt, new materials, a higher level of CNC quality and a wide choice of configurations.

The new Sabatti Rover action is a completely new design, made out of a solid billet of Ergal 55, precision machined to minimize manufacturing-induced tolerances, then hard anodized. The receiver comes with an integral Picatinny rail allowing the mount of riflescopes or other aiming devices.

The new Sabatti Rover bolt is CNC machined from a bar of steel and comes in a chrome or matte black finish, depending on models. The quality of this new three lugs, 60° opening throw bolt, along with a new sturdy extractor and a removable knob, make the new Sabatti Rover action one of the best in the market.

The Sabatti **Rover Hunter** rifle comes with a standard, two lever, trigger group. A three lever “match” trigger group and a single set trigger are available as optional.

The cold-hammer forged barrel makes use of a traditional rifling, out of manufacturing processes that have been further improved, and vaunts all the accuracy Sabatti rifles are famed for. Of particular importance, the barrel comes fitted with a barrel extension which allows ease of barrel interchangeability, without any need for adjusting the head space.

The Sabatti Rover Hunter barrel has a 16 mm (5/8”) diameter, a matte black finish and ends with an M14x1 thread with thread protector steel nut, which allows the user to mount various kind of optional muzzle brakes or flash hiders. Available barrel lengths range from to 18” to 24”.

The Sabatti Rover Hunter rifle comes with a sturdy dark grey polymer stock which combines ruggedness and lightness with improved ergonomics, ending in a soft recoil pad which helps tame the heavier calibers kick. The stock has a flush, black polymer, removable cheek rest. Cheek rests of three different heights are available as optional, as well as a kit of shims to adjust the stock length of pull. A multipurpose steel plate is embedded in the forearm, allowing the mount of bipods or other accessories.

The Rover Hunter rifle offers all of the accuracy, ruggedness and reliability of the Sabatti bolt-action rifles tradition: more than 300 years of Italian gun making experience, at the most affordable price.

New Sabatti Rover rifles family models:

Hunter, Hunter Classic, Hunter Classic Pro, Pathfinder, Shooter, Scout, Patrol, Ranger, Alaskan.

Stock	Polymer, dark grey color; optional interchangeable cheekpiece kit available
Materials	ERGal 55 action, steel bolt and barrel, polymer cheekpiece and buttplate

Company notes

The Sabatti family is active in the gun making industry since little less than 400 years. Passed down from father to son, from generation to generation, all the acquired experiences have not been lost, and are instead what today provides quality to the Sabatti production. Sabatti is a leader in the manufacturing of top-class rifle barrels, whose excellent performances make them highly appreciated all over the World, by gun manufactures as well as by the most demanding sport shooters and professionals.

Except for the stocks, all components of every Sabatti gun are manufactured inside the company, using the best available technologies and materials, and a "know-how" which quite few International companies can boast nowadays.
