SABATTI ROVER RANGER

Sabatti presents the all-new Rover Ranger bolt-action hunting rifle, as part of the completely redesigned "Rover" family of rifles

Sabatti presents the new ROVER family of rifles, a completely redesigned set of bolt-action rifles intended for hunting, sport shooting and professional uses. The new Sabatti Rover family of rifles carries on the high quality, high accuracy tradition and decades old experience of the World appreciated classic Sabatti Rover bolt-action design, further improving it with a redesigned action and bolt, new materials, a higher level of CNC quality and a wide choice of configurations.

The new Sabatti Rover action is a completely new design, made out of a solid billet of Ergal 55, precision machined to minimize manufacturing-induced tolerances, then hard anodized. The receiver comes with an integral Picatinny rail allowing the mount of riflescopes or other aiming devices.

The new Sabatti Rover bolt is CNC machined from a bar of steel and comes in a chrome or matte black finish, depending on models. The quality of this new three lugs, 60° opening throw bolt, along with a new sturdy extractor and a removable knob, make the new Sabatti Rover action one of the best in the market.

The Sabatti **Rover Ranger** rifle comes with a standard, two lever trigger group. A match, three lever trigger group and a single set trigger are available as optional.

The cold-hammer forged barrel makes use of a traditional rifling, out of manufacturing processes that have been further improved, and vaunts all the accuracy Sabatti rifles are famed for. Of particular importance, the barrel comes fitted with a barrel extension which allows ease of barrel interchangeability, without any need for adjusting the head space.

The Sabatti Rover Ranger fluted barrel has a 18 mm (0.71") diameter, cerakote finish, and comes with a muzzle brake mounted on a 5/8"-24 UNEF thread. Available barrel lengths are 18" and 20".

The Sabatti Rover Ranger rifle comes with a sturdy wooden stock with a grey soft-touch finish which combines ruggedness and lightness with improved ergonomics ending in a soft recoil pad which helps tame the heavier calibers kick. The stock accepts AICS magazines and has a set of black polymer, interchangeable cheek rests of different heights as well as well as a kit of shims to adjust the stock length of pull. A multipurpose steel plate is embedded in the forearm, allowing the mount of bipods or other accessories.

The Rover Ranger rifle offers all of the accuracy, ruggedness and reliability of the Sabatti bolt-action rifles tradition: more than 300 years of Italian gun making experience, at the most affordable price.

New Sabatti Rover rifles family models:

Hunter, Hunter Classic, Hunter Classic Pro, Pathfinder, Shooter, Scout, Patrol, Ranger, Alaskan.

Company notes

The Sabatti family is active in the gun making industry since little less than 400 years. Passed down from father to son, from generation to generation, all the acquired experiences have not been lost, and are instead what today provides quality to the Sabatti production. Sabatti is a leader in the manufacturing of top-class rifle barrels, whose excellent performances make them highly appreciated all over the World, by gun manufactures as well as by the most demanding sport shooters and professionals.

Except for the stocks, all components of every Sabatti gun are manufactured inside the company, using the best available technologies and materials, and a "know-how" which quite few International companies can boast nowadays.
